

NOLA VANUALAILAI

Data and Reporting Officer (NCD), Pacific Community (SPC), Suva, Fiji

PROFESSIONAL PROFILE

Pacific public health professional with over 10 years of progressive experience in NCD data management, surveillance systems, and regional capacity building across all 22 Pacific Island Countries and Territories (PICTs). Demonstrated expertise in database development, data visualisation, STEPS survey methodology, and evidence-based reporting to national and regional stakeholders. Currently employed as NCD Officer – Data and Reporting, Public Health Division, Secretariat of the Pacific Community (SPC), Suva.

KEY QUALIFICATIONS — ALIGNED TO ROLE REQUIREMENTS

Qualification: MPH in Biostatistics

Experience: 10+ years in NCD data management, database development, and regional reporting

Technical: MS Excel (advanced), MS Access (VBA automation), Power BI, Python/matplotlib

Regional: Deep knowledge of Pacific health systems across the Pacific Islands

Languages: English (full professional proficiency); Tongan and Fijian (conversational)

PROFESSIONAL EXPERIENCE

NCD Database Development and Data Visualisation

- Designed and developed registry system using Microsoft Access (hub-and-spoke architecture with VBA automation), enabling real-time NCD data capture and reducing manual reporting errors.
- Designed and developed database for NCD screening and apps for data collection.
- Built interactive grouped bar charts and line charts for regional tobacco and alcohol indicators using Python (matplotlib/pandas) sourced from WHO GHO, applying consistent styling conventions and exporting to PNG for embedding in regional reports and presentations.

Supporting NCD Data Collection and Analysis

- Provided direct technical support in developing national NCD data collection tools, database structures, and data quality protocols.

Compiling NCD Data and Generating Reports

- Compiled and analyzed NCD workplace screening data, producing a comprehensive epidemiological report with trend analysis.

Building Country Capacity in NCD Data Management

- Facilitated training for in-country data entry staff across multiple PICTs, delivering hands-on database setup, data cleaning protocols, and reporting documentation to strengthen national NCD data capacity.
- Designed and delivered training materials and a technical documentation registry system.

EDUCATION AND PROFESSIONAL DEVELOPMENT

Degree: MPH in Biostatistics, Fiji National University (FNU)

Current: Artificial Intelligence in Practice – Professional Development Course, 2025–Present

Training: STEPS Survey Methodology
